廣州市一德路海味乾貨街改造

REDEVELOPMENT OF DRIED FOOD MARKET ALONG YIDE ROAD, GUANGZHOU

Synopsis

Analysis of existing conditions reveals that the Pearl River presents a distinctive specific issue regarding the Yide Road in urban development. The area is characterized by a high density of existing buildings and a lack of green space. The project aims to transform this area into a modern, vibrant, and sustainable urban environment.

Government Proposal

According to Guangzhou Yide Road Urban Planning Project (2017-2035), the site is located in the Pearl River Delta, which is a key area for the city's development. The project is part of the city's overall urban planning and aims to improve the quality of life for residents and enhance the city's image.

Issues

Due to the lack of transportation mode from water transport to land transport, the site is facing a series of issues. These include a lack of green space, a high density of buildings, and a lack of modern urban facilities. The project aims to address these issues and create a more sustainable and vibrant urban environment.

Scope

The project scope includes the redevelopment of the dried food market along Yide Road, the improvement of the surrounding urban environment, and the creation of a modern, vibrant, and sustainable urban environment. The project will involve the demolition of existing buildings, the construction of new buildings, and the improvement of the surrounding urban environment.

Analysis of Building Types

Building Type	Area	Height	Volume	Volume
Traditional Building	1000	1000	1000	1000
Modern Building	1000	1000	1000	1000
Commercial Building	1000	1000	1000	1000
Residential Building	1000	1000	1000	1000

Macro Planning

The macro planning of the project involves the integration of the project with the surrounding urban environment. This includes the improvement of the surrounding urban environment, the creation of a modern, vibrant, and sustainable urban environment, and the integration of the project with the surrounding urban environment.

Module Infrastructure Green

This module focuses on the integration of green infrastructure into the urban environment. It includes the creation of green spaces, the improvement of the surrounding urban environment, and the integration of green infrastructure into the urban environment.

Site Character

The site character of the project is characterized by a high density of buildings, a lack of green space, and a lack of modern urban facilities. The project aims to transform this area into a modern, vibrant, and sustainable urban environment.

Existing Configurations

The existing configurations of the project include the existing buildings, the existing streets, and the existing urban environment. The project aims to improve these configurations and create a more sustainable and vibrant urban environment.

Synthesis

The synthesis of the project involves the integration of the project with the surrounding urban environment. This includes the improvement of the surrounding urban environment, the creation of a modern, vibrant, and sustainable urban environment, and the integration of the project with the surrounding urban environment.

Proposed Configurations

The proposed configurations of the project include the proposed buildings, the proposed streets, and the proposed urban environment. The project aims to improve these configurations and create a more sustainable and vibrant urban environment.

First Floor Plan

The first floor plan of the project shows the layout of the buildings, the streets, and the urban environment. It includes the existing buildings, the existing streets, and the existing urban environment.

Second Floor Plan

The second floor plan of the project shows the layout of the buildings, the streets, and the urban environment. It includes the existing buildings, the existing streets, and the existing urban environment.

Third Floor Plan

The third floor plan of the project shows the layout of the buildings, the streets, and the urban environment. It includes the existing buildings, the existing streets, and the existing urban environment.

Carpark Plan

The carpark plan of the project shows the layout of the carpark, the streets, and the urban environment. It includes the existing carpark, the existing streets, and the existing urban environment.
